

Excel Underground was founded in 2007 to fulfill the growing need of quality service in the utility locating industry. Although the company itself is young, I brought with me, over twenty years of locating experience in Telecommunications, CATV, Electric, Natural Gas, Traffic Signals, Water, Steam, Sanitary and Storm. I have located for over fifty different Utility Companies and Municipalities in four different states. Over the years I have also completed hundreds of private locates in both residential and commercial areas.

I have also established many professional relationships over the years with utility representatives, excavators, engineers, surveyors and others in the industry. This provides the solid foundation of Excel Underground. Our quality service, professional integrity and commitment to our customers and employees are constant building blocks upon this foundation. I invite you to use our services and see for yourself that all locating companies are not created equal.
